Active OWEA Members are encouraged to use Members Only Access at www.ohiowea.com for registration and contact hour tracking assistance. OWEA assists with contact hour tracking and we do our best to keep accurate information and track attendance properly. However, tracking contact hours is still the responsibility of the individual. Contact hour forms need to be submitted completely and legibly. If you have not registered for the event online or are substituting for another registrant, you need to make sure your information is recorded at the site during registration. Thank you for your help. Please see any of the NWOWEA officers with questions.
