

## Annual Business Meeting and Training Opportunity

Thursday, May 21, 2015

### Canton WRF Construction Overview & Update Technical Sessions & Optional (free) Tour of Pro Football Hall of Fame

The Water Reclamation Facility (WRF) of the City of Canton, Ohio is responsible for treating all sanitary sewage that flows to the facility from a variety of sources throughout the greater Stark County area. The WRF has consistently been a leader in the sewage treatment field, earning a variety of industry awards and distinctions over the past 15 years. In 2010, the facility was honored with the PLATINUM distinction from the [National Association of Clean Water Agencies](#) (NACWA)

The WRF has embarked upon the largest capital improvements project ever undertaken by the City of Canton. The total project cost is currently projected to be between \$80,000,000 and \$85,000,000. Upon completion of construction in 2017, it is believed that WRF will be the largest facility in the world utilizing membrane bioreactor (MBR) technology.
