

The Northeast Section of the Ohio Water Environment Association
invites you to attend our

Business & Section Meeting

**Water Environment
Association**

*Preserving & Enhancing
Northeast Ohio's
Water Environment*

Friday, May 19, 2017 ◆ **Rocky River WWTP** ◆ **Rocky River, Ohio**

The Rocky River WWTP is located at 22303 Lake Road, Rocky River, Ohio. This regional wastewater treatment plant is owned by the cities of Bay Village, Fairview Park, Rocky River and Westlake. It is operated by the City of Rocky River. Sanitary sewage from all four cities is treated at the plant. The plant was designed for 22.5 MG average daily flow and 45 MG peak secondary treatment flow. Treatment processes include primary clarification, fixed film reactors and anaerobic digestion. The plant presses Class B Biosolids for land application and landfill.

The plant was originally constructed in 1937. It was completely replaced in 1962 to include an increase in capacity and biosolids processing. Secondary treatment was added in 1982. Major improvements over the years have included wet weather increased capacity, headworks improvements and upgrades, electrical upgrades, and complete plant SCADA integration.

Registration and Refreshments: Rocky River Wastewater Treatment Plant
22303 Lake Road, Rocky River, OH 44116
7:00 - 10:30a
