

Young Professionals Event

Solon Water Reclamation Facility Tour

The Solon Water Reclamation Department will host the Young Professionals group to tour its wastewater treatment facility. The Solon WRF was originally built in 1962, and sits on a 36 acre site on the city's southwestern border. Expanded in 1970 and again in 1980, a third and final expansion was completed in 1996. The plant is designed to treat 5.8 million gallons of wastewater per day. In 2018 the plant constructed a 1.7 MG equalization tank and installed new screening and grit removal equipment.

Attendees can receive 1 contact hour for this event. Participation is limited. After the tour, the group will gather for food and drinks.

Thursday, August 22, 2019 4:30 PM
6951 Cochran Road
Solon, OH 44139
