Local Leaders Webinar Series

Air Pollution Risk Management Program for Drinking Water and Wastewater Treatment Plant Superintendents/Operators

July 29, 2021 at 10:00 - 11:00 a.m. EST

Jeff Beattie
DAPC

This webinar will focus on the basics of the Risk Management Program (RMP) as directed under Ohio Revised Code and how it applies to both Water Treatment Plants (WTP) and Wastewater Treatment Plants (WWTPs). The intent of the RMP is to put requirements in place to help minimize and/or prevent accidental releases/spills from happening. Requirements may include, but are not limited to, assessing risks from the facility, operating procedures, training employees, emergency response plans and prevention programs to put into place at the facility. Regulation is directed to those public and/or private WTP and WWTP that use chlorine in excess of 2,500 pounds in a process.

One-hour Registered Environmental Health Specialist (REHS) and Environmental Health Specialist in Training (EHST) (formerly RS/SIT credits) from Ohio Department of Health as well as for Water & Wastewater Operator Certification from OEPA.

Ohio EPA's Division of Environmental and Financial Assistance will be holding its eighth installment of In Your Community (IYC) series of webinars for 2021. Each webinar will focus on environmental issues that have an impact at the local level - from how Ohio EPA regulates sources of air pollution, waste management, wastewater and stormwater discharges to ways your community can promote environmental stewardship and improve the environment.
