Utility Innovation Research

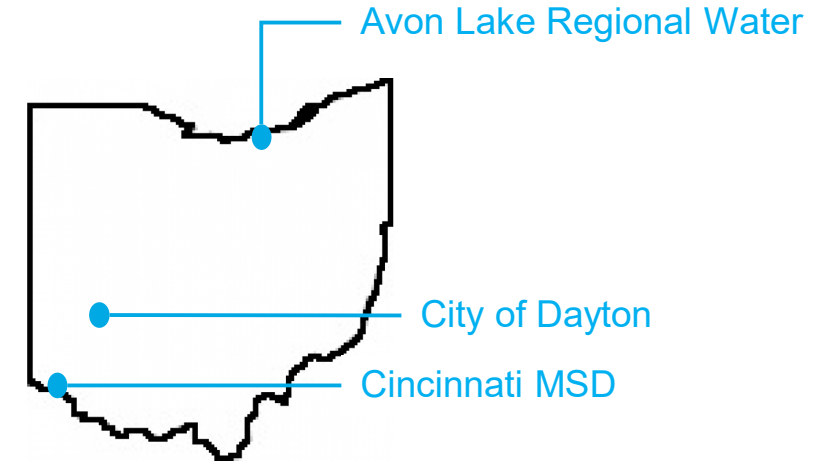

Launched Development of Innovation Framework with 25 Utilities

2015

Published Utility Innovation Framework and Launched Campaign

2017

2018

Launched Leading Water and Wastewater Utility Innovation with 68 Utility Partners AWWA, WEF, AMWA, NACWA, WSAA

Expanded Participating Utilities to 50 AWWA, WEF, WSAA, WE&RF

Drivers for Innovation

- Financial instability
- Water resource adequacy
- Shifting water demands
- Aging infrastructure
- Changing workforce
- New technology
- Stakeholder expectation
- Regulations
- Efficiency and optimization
- Climate uncertainty

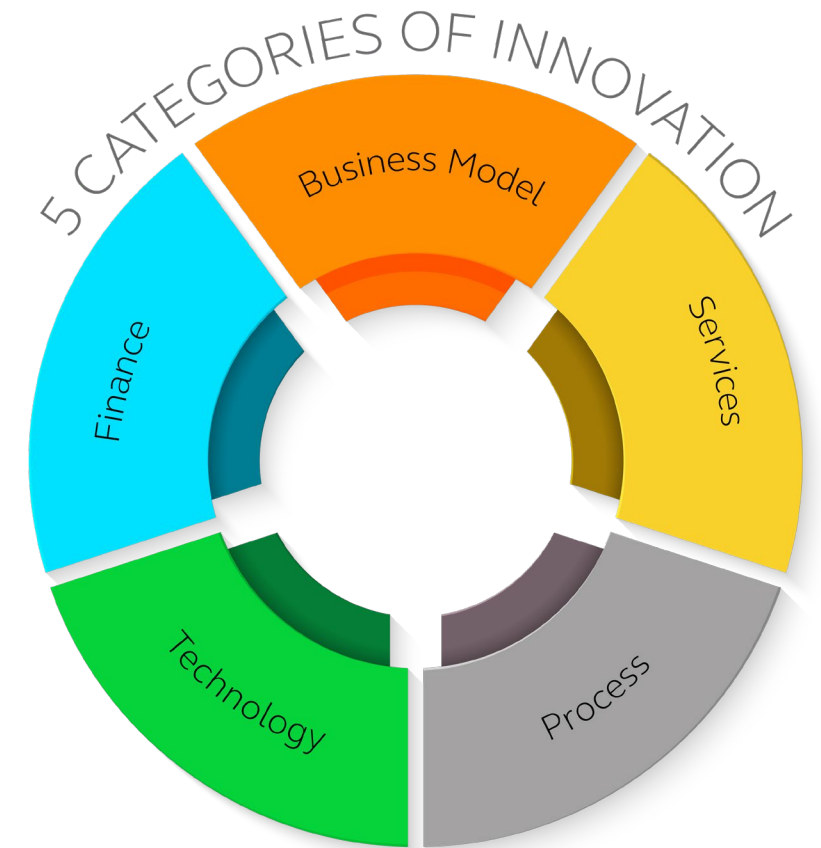

- 1. Implementation of strategy**
- 2. Sustainability / affordability**
- 3. Customer expectation**
- 4. Workforce of tomorrow**
- 5. Digital transformation**

A Definition of Innovation (WRF 4642)

“The application of new ideas resulting in increased value to our customers and/or increased productivity.”

WRF 4642 Definition for “Innovation”

Innovation management = stewarding ideas as critical assets.

Impact of Innovation

Sustainability

Waternet is advancing toward energy neutrality by 2020 with heat exchangers, solar panels and investigating biomass reuse.

Better Solutions

AlexRenew leveraged partnerships to bring nutrient removal technologies to US - leading to 20% energy reduction with a projected savings of \$400,000/yr.

Financial Impact

American Water reduced annual OpEx and achieved a payback time of <2 years with new algae control technology.

Utility Innovation

Recognition

Queensland Urban Utilities was named *Business Review Weekly's* Top 10 Most Innovative Companies.

Stronger Organization

Sacramento Area Sewer District fosters a sustainable workforce through broad collaboration, engagement and communication – 131 employees engaged (over 40% of staff).

Workforce Development

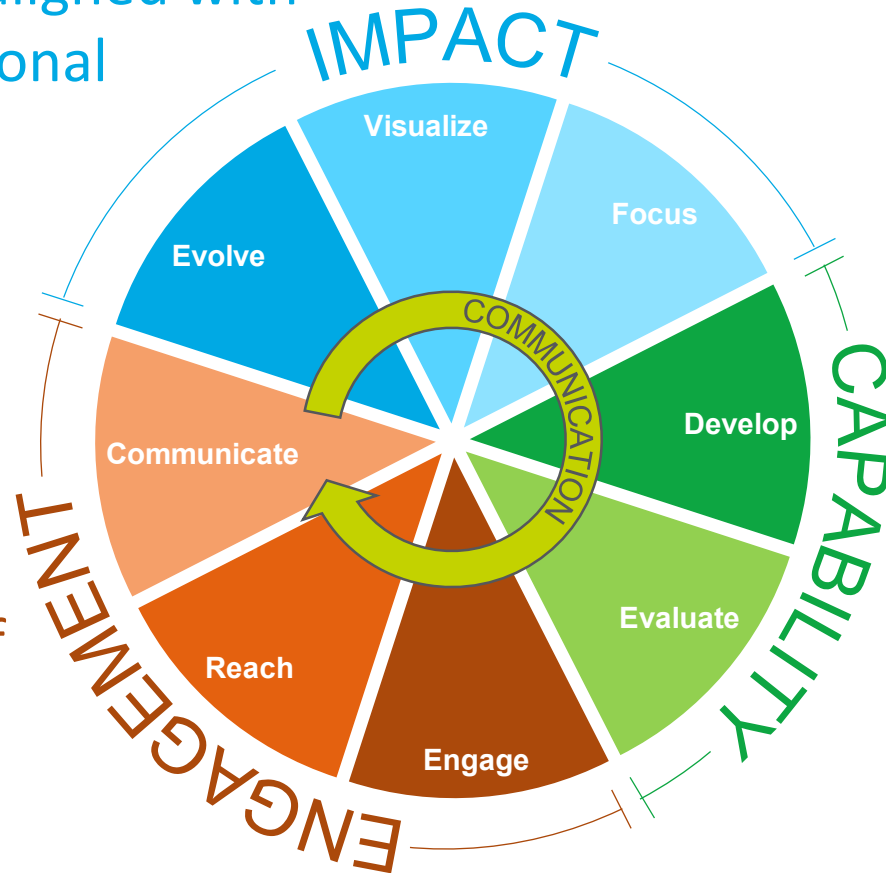

Santa Clara Valley Water District collaborates with 45 utilities and community colleges on to address labor needs in mission critical jobs.

Utility Innovation Framework (WRF 4642)

Results-oriented. Tangible and intangible improvement aligned with leadership and organizational philosophy.

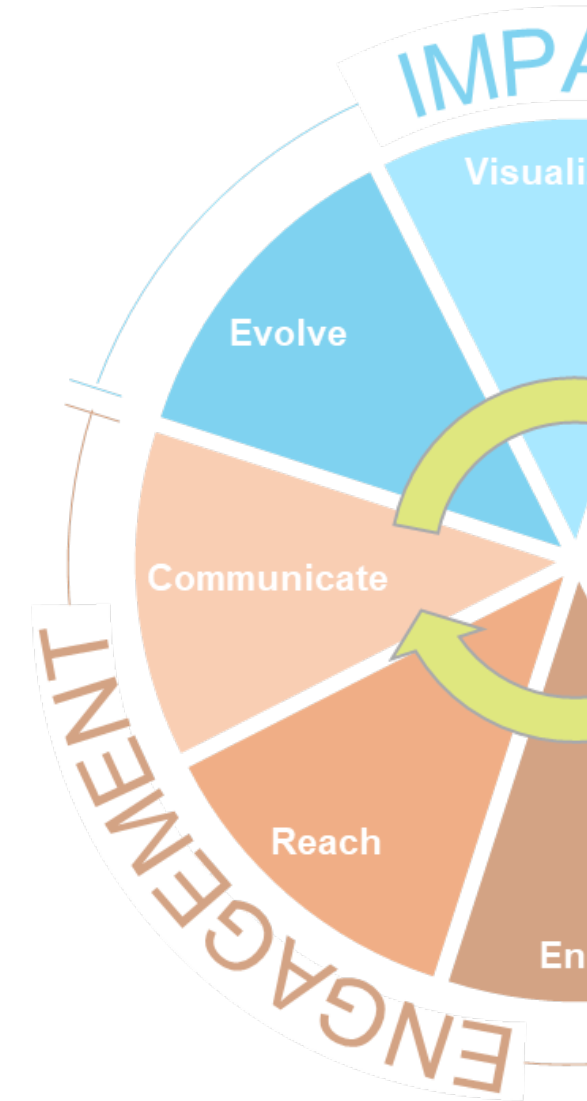

People-oriented. Ideators, mentors, adopters leading initiation and application of innovation.

Ecosystem-oriented. Environment encouraging growth and maturation of ideas.

Eight Innovation Disciplines

1. **Visualize** - maintain a long view that empowers and inspires innovation
2. **Focus** - define challenges that guide investment
3. **Develop** - invest resources in new ideas
4. **Evaluate** - test concepts in scaled and relevant applications
5. **Engage** - motivate, enable and reward stakeholders
6. **Reach** - utilize resources outside of the organization
7. **Communicate** - capture and convey defining success stories
8. **Evolve** - implement concepts and measure impact

Eight Key Business Disciplines

WRF 4907 Leading Water and Wastewater Utility Innovation

1. Influencing the Social Dynamic of Innovation

2. Accelerating Innovation Through Partnerships

3. Creating an Innovation Planning Tool

4. Developing Innovation and Launch Strategies

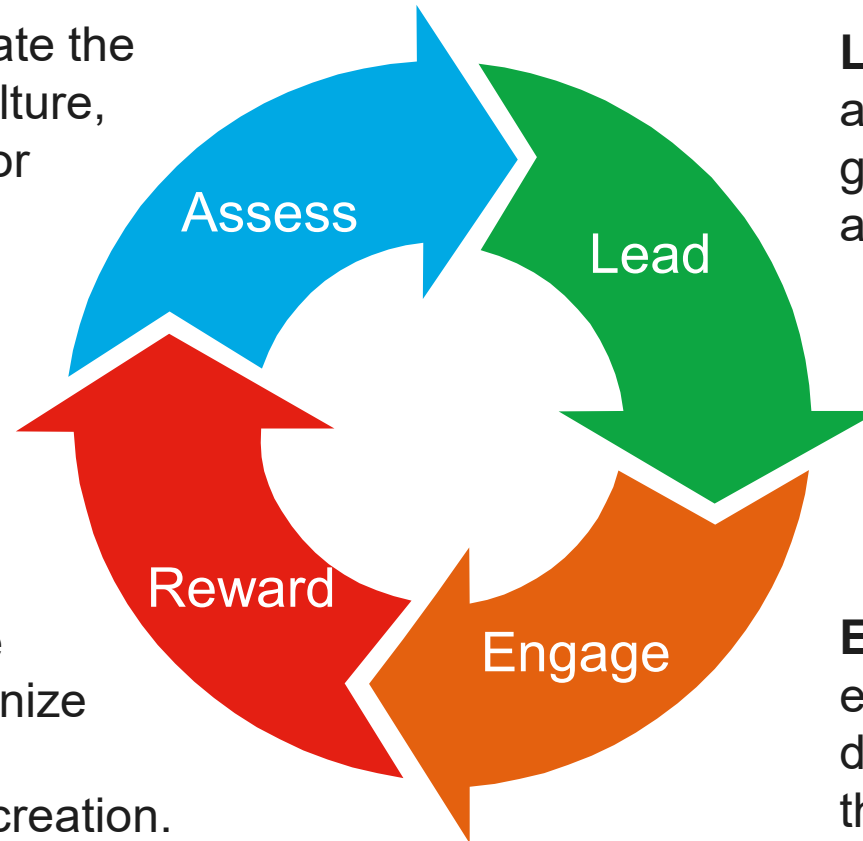

5. Compiling Innovation Leaders Resource

Influencing the Social Dynamics of Utility Innovation

Assess. Approaches to evaluate the impact engagement has on culture, change trajectory, and areas for improvement/opportunity.

Reward. Practices that set the expectation - normalize, recognize and reinforce participation in innovative-thinking and value creation.

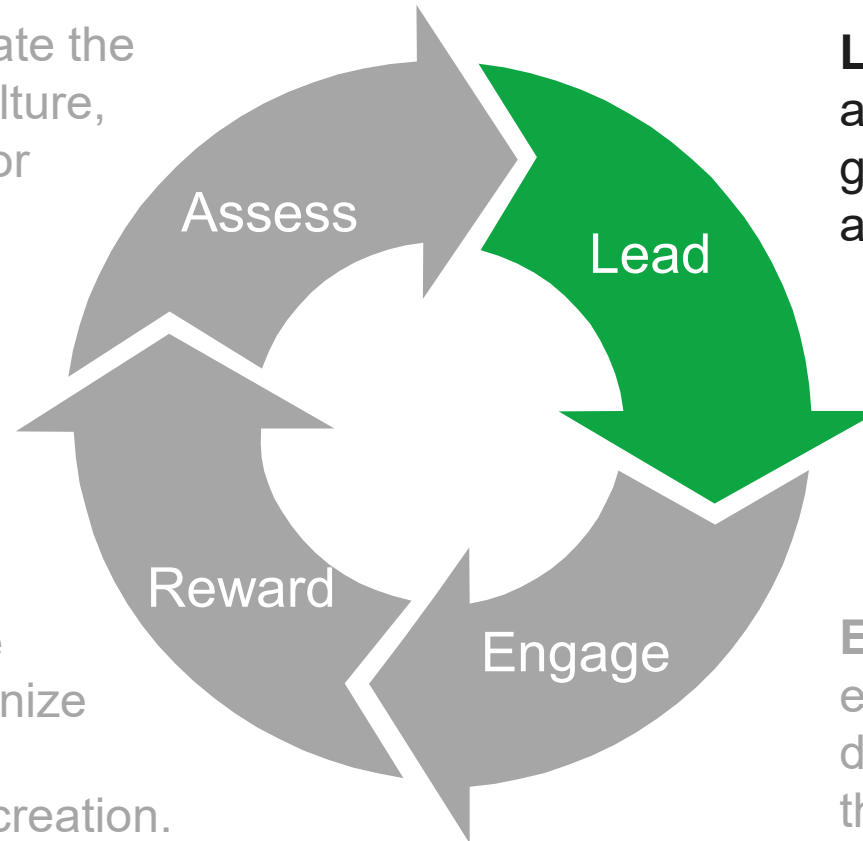

Lead. Individuals or teams who actively seek, direct and foster the growth of new concepts for learning and overall value creation.

Engage. Practices that connect and empower staff to create, develop and deploy new concepts that bring value to the customers, environment and organization.

Influencing the Social Dynamics of Utility Innovation

Assess. Approaches to evaluate the impact engagement has on culture, change trajectory, and areas for improvement/opportunity.

Reward. Practices that set the expectation - normalize, recognize and reinforce participation in innovative-thinking and value creation.

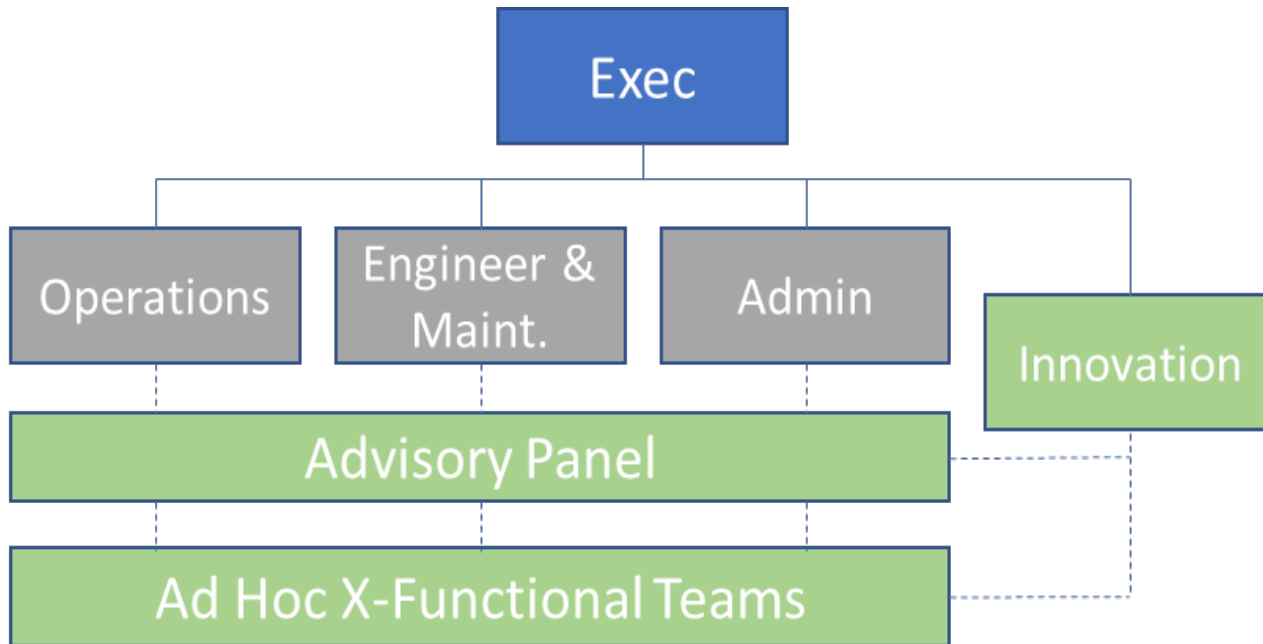

Lead. Individuals or teams who actively seek, direct and foster the growth of new concepts for learning and overall value creation.

Engage. Practices that connect and empower staff to create, develop and deploy new concepts that bring value to the customers, environment and organization.

Possible Organizational Structure

Innovative Culture and Reporting Structure

Utility Innovation Leaders

Responsibilities

Define innovation

Develop program

Lead innovation team

Engage/Develop staff

Build idea pipeline

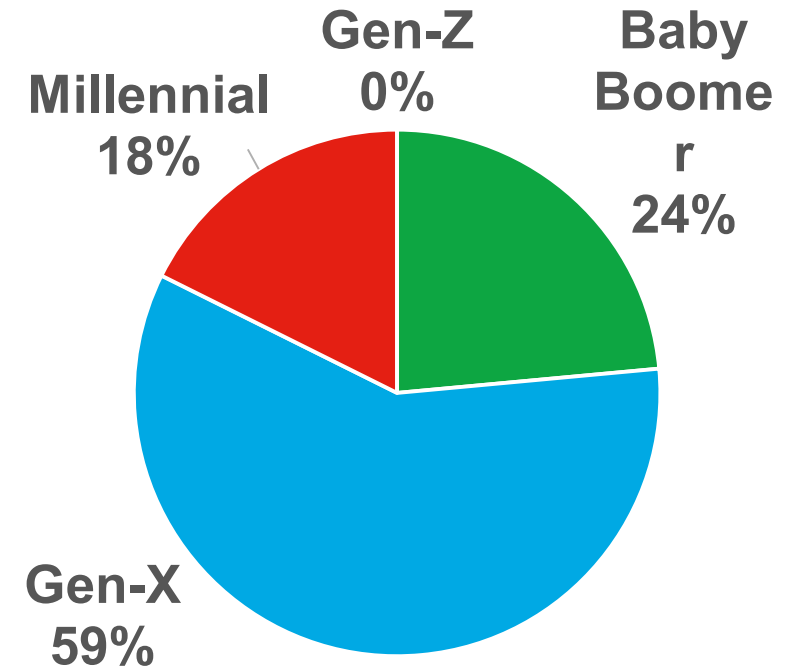

Establish partnerships

Keys for success?

- Communicate with Executive Management and strategically align innovation efforts.
- Create safety for innovation founded on trust and curiosity
- Share successes and inspire
- Ignite passion and commitment throughout the organization by creating ambassadors
- Engage the entire organization using various engagement tactics

Utility Innovation Leaders

- 72% are full-time
- 50% reside in executive management
- 88% with over 10 years of water sector experience
- 71% recruited from within the organization
- 56% had Master's Degree or Doctorate (6% had formal innovation training)
- Must have experience with failure...
- Traits - vision caster, communicator, networker, explorer, facilitator, flexible, humble, mentor, passionate

Utility Innovation Teams

- 43% of utilities had some form of innovation team
- 41% had governance document
- 59% have role descriptions
- Usually one team (avg 11 people), representing multiple generations and departments

Responsibilities

Idea Capture

Idea Selection

Idea Development

Adoption/ Engagement

Improving Sustainability and Operations through Innovation Leadership

The Engineering and Environment Services Division (EESD) manager at WSSC was tasked with developing an innovation program and leading this program to success as a part-time, informal innovation leader for the organization.

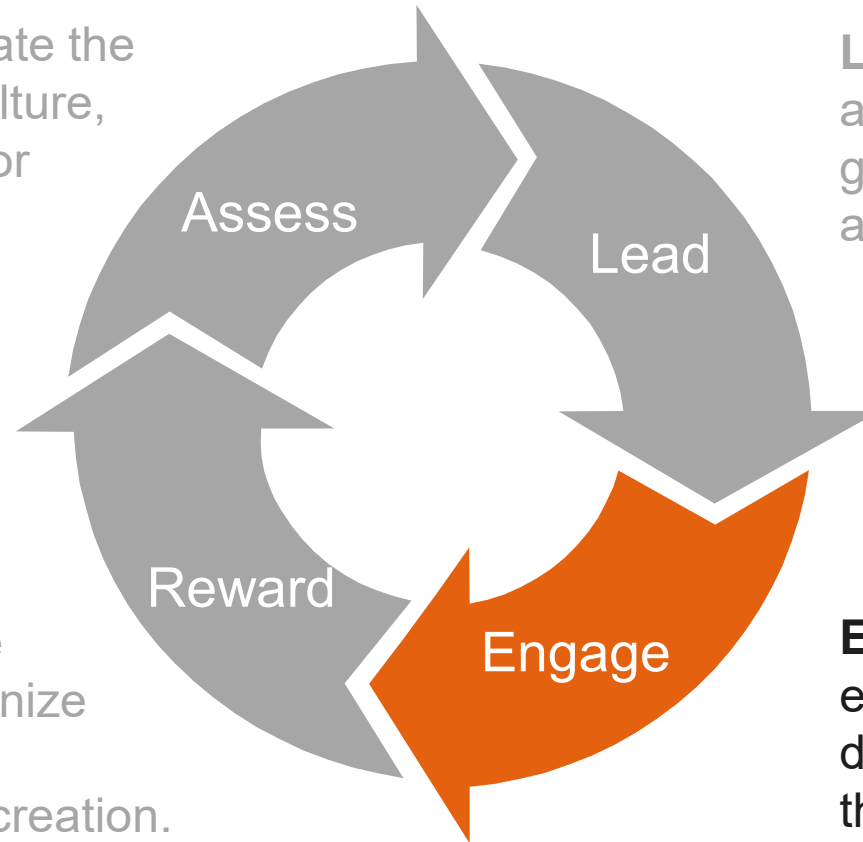

The EESD manager has established a team of three resources fully dedicated to innovation and research.

- Engineering Research Specialist
- Principal Scientist
- Product Development Engineer

Influencing the Social Dynamics of Utility Innovation

Assess. Approaches to evaluate the impact engagement has on culture, change trajectory, and areas for improvement/opportunity.

Reward. Practices that set the expectation - normalize, recognize and reinforce participation in innovative-thinking and value creation.

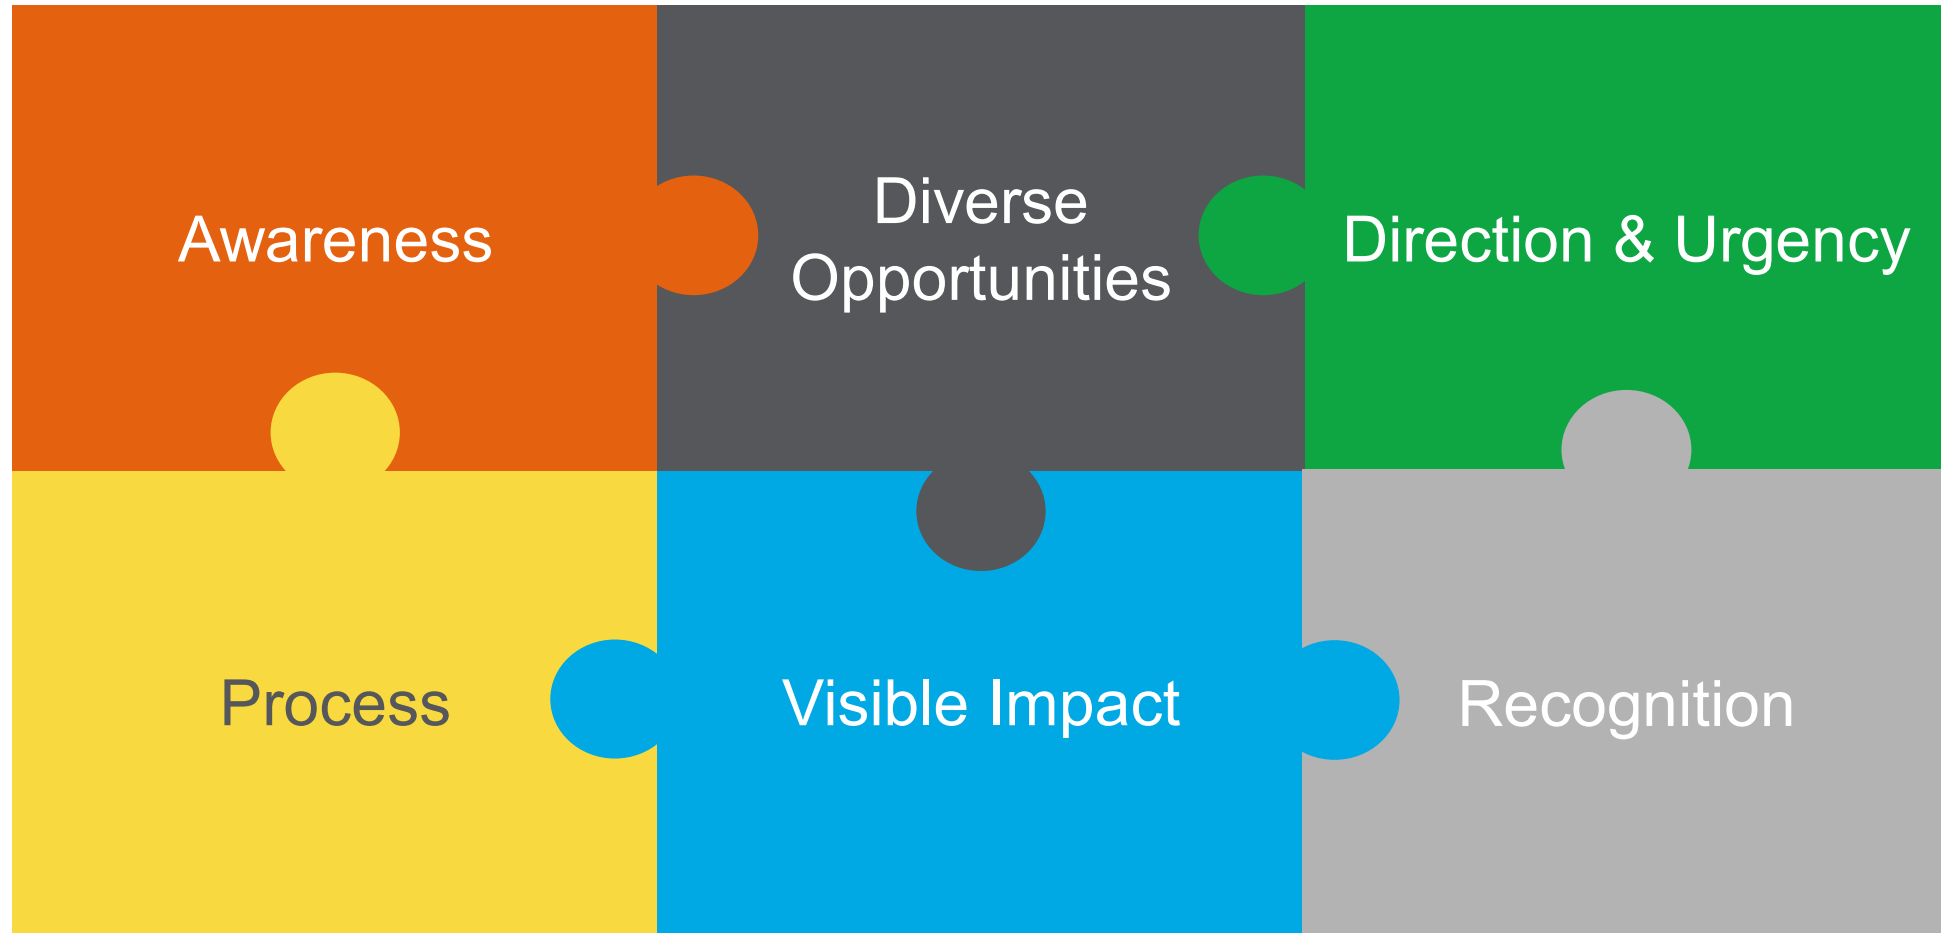

Lead. Individuals or teams who actively seek, direct and foster the growth of new concepts for learning and overall value creation.

Engage. Practices that connect and empower staff to create, develop and deploy new concepts that bring value to the customers, environment and organization.

Internal Stakeholder Engagement

Growth Opportunities

King County

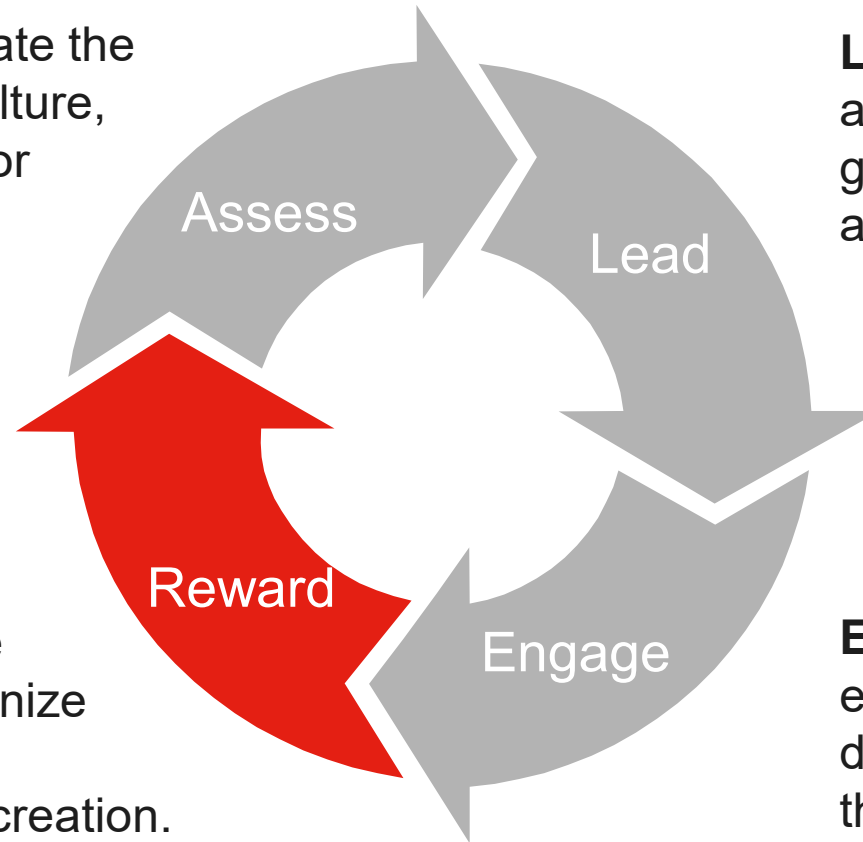

Bright Idea to be LEAN

- Online idea submission platform – Bright Ideas
- LEAN Management system training offered to all staff to foster continuous improvement and innovation
- Improved time to complete 60% engineering review from 4 months to 1.5 months

Influencing the Social Dynamics of Utility Innovation

Assess. Approaches to evaluate the impact engagement has on culture, change trajectory, and areas for improvement/opportunity.

Reward. Practices that set the expectation - normalize, recognize and reinforce participation in innovative-thinking and value creation.

Lead. Individuals or teams who actively seek, direct and foster the growth of new concepts for learning and overall value creation.

Engage. Practices that connect and empower staff to create, develop and deploy new concepts that bring value to the customers, environment and organization.

Rewards and Recognition

36% of utilities have a Rewards and Recognition Program

Importance of Rewards and Recognition

- Demonstrate employees' value in the innovation program
- Provide incentives for participation and grow alumni (i.e., build buy-in)
- Provide program exposure
- Promote message

Non-Monetary Rewards and Recognition

Percent of Utilities with Programs

The Maturation of Rewards and Recognition

Rewards and Recognition

The image shows a pyramid diagram with five levels: URBANHERO (CEO selected), URBANINSPIRATION (six monthly/annual nomination process), URBANACHEIVER (group/team level at manager's discretion), URBANCOMMITMENT (six monthly), and URBANSPRIT (instant and spontaneous Peer to Peer, within and from external partners, anytime and no limits to Mini-recognition cards via UrbanUtilities). To the left is a card that says "Thank you for showing URBANSPRIT Your idea demonstrated great thinking!" with an illustration of two people. To the right is a photograph of two glass awards.

Utility Innovation Leaders

- Organizationally, innovation should be sponsored by chief exec and supported from a position outside of organizational hierarchy.
- There is a “right” person for this position.
- They are most likely already serving in this role somewhere within the organization
- Should be someone with knowledge and understanding of culture
- These are generally emerging leaders and are highly mobile
- Role descriptions, resources and team are important factors for success
- Support also must include front-line leaders

Internal staff engagement

Staff Engagement

- Identify need and urgency of innovation
- Provide wide variety of opportunities for participation – active and passive
- Establish communication protocol
- Establish tiered but flexible recognition program
- Experiment and start small to refine approach
- Provide training:
 - **Awareness:** terminology, innovation process, priorities, opportunities, resources, research/concepts
 - **Tactics:** brainstorming, design thinking, idea development, business case development
 - **Soft skills:** working in teams, communicating, innovative thinking, leading change, nurturing innovation
 - **Lessons Learned:** external successful innovations and internal success stories.

Internal Stakeholder Engagement
